

CADEY O'LEARY COLLECTION
BRINGING YOU HOME

Moving With Pets

PRE-MOVE

- **UPDATE TAG**

Get a new collar with an easy-to-read name and number with your new address and contact details.

- **OBTAIN VETERINARIAN RECORDS**

Procure your current vet records so that you can transfer them to your new pet's doctor.

- **GET YOUR PET USED TO BOXES**

You can help your pet adjust to the moving process by bringing in moving boxes early, and by keeping your furry friends in a familiar room you plan to pack up last.

- **KEEP THEIR ROUTINE**

Feeding, walks and playtime! Try to keep your pet's stress levels down.

DURING MOVE

- **PREPARE AN OVERNIGHT KIT**

Compile an easily-accessible 'overnight kit' that has enough dog food, kitty litter, toys, grooming tools and medication to sustain your pet and keep them comfortable during the first few days of unpacking.

- **KEEP A COMFORTABLE, SECLUDED SPACE FOR YOUR PET**

Consider putting dogs and cats in a room with a door that can be closed during move-out and move-in. Bring their blanket, toys and crate. Make sure they can still hear you so they don't think that you left them alone.

- **PET-PROOF YOUR HOME**

Secure windows, gates and doors. Check for pest control traps left behind and remove/isolate possible threatening plants in your yard.

POST-MOVE

- **INTRODUCE THEM SLOWLY**

When you arrive, give your pet ample time to sniff around and explore their new surroundings.

- **KEEP THEIR ROUTINE**

The quicker you bounce back to your normal, daily routine, the faster your pet will feel at home.

- **LOVE AND CARE**

Time to spoil your pet with plenty of positive attention and interactions. If your schedule allows, try staying home the first week to help reassure your pet that everything is fine.
