### TECHNICIAN NOTES

Hi Eleanor, thank you for having us service your septic system. The system looked so much healthier this time. the fluids in the tank were at operating level, which means they were just below the inlet pipe. The scum layer on the top of the tank measured 4 inches, which is a little thick considering how long it has been since we pumped, but it is a good sign to show that it is time to pump again. The water in the middle of the tank was slightly dark in color, apart of this is because the tank itself is so dark because it went so long in the past not being pumped. The sludge at the bottom of the tank was a little thick too. We like to see that between 4-6 inches. Yours measured 6 inches, but again that is deep considering it hasn't been that long since we pumped the tank. Both of the baffles looked good. My recommendation since it has been 13 months, and you rent it, is that we pump the tank once a year. It is better safe than sorry with an older tank. As always call anytime with questions or concerns. I hope you guys have a great holiday. Kim

### SERVICES PERFORMED

Pump Septic Tank [1] @ 350 350.00

**Total** \$ 350.00

**Less Amount Paid (Online Card)** - \$ 350.00

**BALANCE DUE**

**PAID**

**\$ 0.00**

**Your next service is due on or about October 1, 2025.**

- Pump Septic 1000 Gallon Tank
