Several dimensions are measured to the interior boundaries of the exterior walls and the completion of interior demising walls and/or floor over the dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally refers to the interior or space in balance for purposes with applicable location or as total components). For the purposes of this Declaration, see Section 1.2 of the Declaration. The area of the Unit, determined in accordance with these defined Unit boundaries, is not to be used for other purposes. These floor measurements of spaces set forth on this floor plan are generally taken at the greatest points of each given room as if the room were a perfect rectangle, without regard for any curvatures. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length times width. All dimensions are approximate and may vary with actual construction, and all floor plans and development plans are subject to change. All dimensions of furniture, appliances, fixtures and other matters of detail including surface finishes, sizes of fixtures and elevations, are considered only and are not necessarily included in each Unit. Dimensions are only included to the extent provided in your purchase agreement.
