Stated square footages and dimensions are measured to the interior boundaries of the exterior walls and the interior of interior dividing walls and may vary from the square footages and dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration which generally only includes the interior airspace between the perimeter walls and includes all interior structural components and other common elements. This method is generally used to sales materials and is provided to allow prospective buyer to compare the Units with units in other condominium projects that utilize the same method. It does not include items set forth on this floor plan or generally taken at the farthest points of each given room (as if the room were a perfect rectangle) without regard for any reduction in volume. Accordingly, the actual room will typically be smaller than the product obtained by multiplying the stated length and width. All dimensions are intended and will vary with actual construction, and all floor plans, specifications and other development plans are subject to change and will not necessarily accurately reflect the final plans and specifications for the development. All depictions of appliances, counters, sinks, floor coverings and other materials and fixtures, without limitation, items of finish and decoration are conceptual only and are not necessarily included in each Unit. EQUAL HOUSING OPPORTUNITY.
