DIMENSIONS
23'-7" x 22'-2"

Based dimensions are measured to the exterior boundaries of the exterior walls and the projection of interior dividing walls unless otherwise noted. Dimensions that would be determined by using the description and drawings of the "Unit" are built in the floor plan. Units generally only include the interior spaces between the perimeter walls and are not intended to be used as a reference for the exterior lot boundaries, see Section 2.2 of the Declaration. The size of the Unit determined in accordance with these defined Unit boundaries, is set forth in the Declaration. Note that measurements of units are taken as the floor plan is generally taken at the greatest points of each given room so if the room were a perfect rectangle, without regard for any corners. Accordingly, the size of the actual room will typically be smaller than the product obtained by multiplying the stated length times width. All dimensions are approximate and may vary with actual construction, and all floor plans and development plans are subject to change. All dimensions of fixtures, appliances, cabinets and other items of detail including, without limitation, items of built-in furniture, are conceptual only and are not intended to be included in each Unit. Such items are only included for use in the information provided in your purchase agreement.
