Easting: 255449.2 Northing: 4202099.1

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT

CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of this permit does not ensure that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
- 2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
- 3) Approved pursuant to CRS 37-92-602(3)(b)(II)(A), for a change of legal description and number of acres on well permit 252000, as the only well on a tract of land of 15.39 acres described as lot BV2, Idarado Legacy Rural Cluster, San Miguel County.
- 4) The issuance of this permit hereby cancels permit no. 252000.
- 5) The use of ground water from this well is limited to fire protection, ordinary household purposes inside one single family dwelling, the irrigation of not more than one (1) acre of home gardens and lawns, and the watering of domestic animals as described in CRS 37-92-602(1)(b). Such use is restricted by the approved annual amount of groundwater that may be diverted by the well. The annual withdrawal is limited to 1.0 acre-foot, which, in addition to one single family dwelling (0.3 acre-foot), will typically allow for the irrigation of approximately 13,000 square feet of lawn and garden (0.65 acre-foot), and the watering of up to four large noncommercial domestic animals (0.05 acre-foot).
- 6) The pumping rate of this well shall not exceed 15 GPM.
- 7) The annual withdrawal of ground water from this well shall not exceed 1.0 acre-foot.
- 8) The return flow from the use of this well must be through an individual waste water disposal system of the non-evaporative type, or through the Telluride Sewer System's central waste water disposal system, and the return flow shall be returned to the same stream system in which the well is located.
- 9) This well shall be constructed not more than 200 feet from the location specified on this permit.
- 10) A totalizing flow meter must be installed on this well and maintained in good working order. Permanent records of all diversions must be maintained by the well owner (recorded at least annually) and submitted to the Division Engineer upon request.
