2026 paint trends

While the hues of 2025 focused on warmth and balance, 2026 paint trends are all about creating spaces that feel personal, calm, + timeless.

Benjamin Moore - Blue Nova - Elevate the everyday and expand horizons through color that is sure to inspire.

Behr - Cracked Pepper is a subtle black that is there to elevate your senses and either make a statement or keep it simple.

Sherwin Williams - The result is Upward, a breezy, blissful blue. The color found when we slow down, take a breath, and allow the mind to clear

Meet The Co-Stars:

DID YOU KNOW? Homes with a slate blue or black door, on average, sold for more money? The color of the front door can drastically affect not only the feel of the home but also its value. The front door is often one of the first impression's potential buyers may get.

Refreshing the main interior walls with a coat of paint can make your home feel clean, newer, well-cared for, and more attractive to buyers. The right neutral color throughout your home can help to give your home a cohesive look and actually gives the appearance of more square footage!

We live here, we work here,
& we're here for you!
