Modern design and architectural features unite in this newly remodeled three-story contemporary beachfront home by world-renowned architect Richard Landry. Pure white Nano Glass slabs & plaster wall finish were used to create crisp lines and precise detailing, giving this open floor plan home a light, airy feeling & providing a clean backdrop for special mood/ambience lighting features. Steps to the beach, the first floor includes an ocean front living room with fireplace, dining area & gourmet island kitchen with outdoor entertaining deck. The second floor owner's suite with fireplace, private deck & spa-like bath has a second glass wall that floods the floor with natural light, but can be closed with automated shades/draperies for privacy. The ultimate indoor/ outdoor recreation space is created with pocket doors that completely open between the media room, custom bar & roof terrace with fire pit and built-in BBQ. Located behind the gates of a private subdivision off Broad Beach Road.

Interior

Total bedrooms	4
Total bathrooms	3.5
Full bathrooms	3
Half bathroom	1

Area & Lot

Living area	4,300sq.ft.
