

Certificate of Analysis

Attention: Naomi Couture
1 Leona Dr
E Waterboro ME 04030

Lab ID Number: 302105067
P.O. Number: 302105067 CC
Date/Time Collected: 5/18/2021 07:20
Date/Time Received: 5/18/2021 16:10
Date Reported: 5/19/2021

Owner: Naomi Couture
Location: 1 Leona Dr E Waterboro ME
Sample Type: Potability

Legend

 Meets Acceptable EPA Limits

 See Notation

 Does Not Meet EPA Limits

Parameter:		Your Result:	EPA LIMIT:	Unit:	Method:	Preparation Date/Time	Analysis Date/Time:	Reporting Limit:
Chloride, Total		26	250	mg/L	SM 4500Cl- E		5/19/2021 / 08:39	2.5
A 1/5.0 dilution was performed in order to bring the concentration of Chloride, Total into the calibration range. The reporting limit has been adjusted accordingly.								
Fluoride		<0.20	4.0	mg/L	SM 4500F E		5/19/2021 / 09:24	0.20
Nitrite-Nitrogen, Total		<0.20	1	mg/L	NECi Method 1.0		5/19/2021 / 11:29	0.20
Nitrate-Nitrogen, Total		<0.50	10	mg/L	NECi Method 1.0		5/19/2021 / 11:38	0.50
Arsenic, Total		<1.000	10.0	µg/L	EPA 200.8	5/18/2021 / 17:00	5/19/2021 / 02:46	1.000
Lead Total		<1.000	15.0	µg/L	EPA 200.8	5/18/2021 / 17:00	5/19/2021 / 02:46	1.000
Uranium Total		<1.000	30	µg/L	EPA 200.8	5/18/2021 / 17:00	5/19/2021 / 02:46	1.000
Copper Total		0.0654	1.3	mg/L	EPA 200.8	5/18/2021 / 17:00	5/19/2021 / 02:46	0.001
Iron Total		<0.050	0.3	mg/L	EPA 200.8	5/18/2021 / 17:00	5/19/2021 / 02:46	0.050
Manganese Total		<0.001	.05	mg/L	EPA 200.8	5/18/2021 / 17:00	5/19/2021 / 02:46	0.001
Sodium Total		35.9		mg/L	EPA 200.8	5/18/2021 / 17:00	5/19/2021 / 02:46	0.001
*This sample is at or above the MEG of 20 mg/L of Sodium established by the MECDC. Sodium is not listed as a primary nor secondary contaminant of concern by the USEPA. See Notation 1.								
Hardness by calculation		<10		mg/L	SM 2340B	5/18/2021 / 17:00	5/19/2021 / 02:46	10
Calcium, Total		<1.000		mg/L	EPA 200.8	5/18/2021 / 17:00	5/19/2021 / 02:46	1.000
Magnesium, Total		<1.000		mg/L	EPA 200.8	5/18/2021 / 17:00	5/19/2021 / 02:46	1.000
pH Electrometric		5.97	6.5 to 8.5	stu@25C	EPA 150.1		5/18/2021 / 16:34	2.0
*This sample is below the SMCL pH 6.5-8.5 range established by the USEPA. See Notation 3.								
Total Coliform Colilert18		<1		MPN/100mL	SM9223B	5/18/2021 / 16:50	5/19/2021 / 13:00	1
E.Coli - Colilert Enumeration		<1	1	MPN/100mL	SM9223B	5/18/2021 / 16:50	5/19/2021 / 13:00	1

Comments:

 For the above tests only, this water meets acceptable EPA Limits.

All samples analyzed for Nitrate-N and/or Nitrite-N samples must be thermally preserved to 4±2°C. However, the Maine CDC Drinking Water Program will accept non-thermally preserved test results.

Certificate of Analysis

The following Notations may be referenced above.

Notation 1: The Maximum Exposure Guideline (MEG) is a health-based guideline set by the Maine Center for Disease Control and Prevention (MECDC). MEGs are recommendations for concentrations of chemical contaminants for all drinking water systems below which there is minimal risk of a harmful health effect resulting from long-term ingestion of contaminated water. These recommendations can be found online at <http://www.maine.gov/dhhs/mecdc/environmental-health/cohp/wells/documents/megtable2016.pdf>. Please contact one of the State of Maine's Bureau of Health Toxicologists, toll free, at 1-866-292-3474 for more information.

Notation 2: The Maximum Contamination Level (MCL) is set by the United States Environmental Protection Agency (USEPA) through the National Primary Drinking Water Regulations and are legally enforceable drinking water standards that apply to all public water systems. These regulations can be found online at <http://water.epa.gov/drink/contaminants/secondarystandards.cfm> or by calling the Safe Drinking Water Hotline at 1-800-426-4791. Contaminants at or above the MCL are considered to impart potential negative health effects.

Notation 3: The Secondary Maximum Contamination Level (SMCL) is set by the United States Environmental Protection Agency (USEPA) through the National Secondary Drinking Water Regulations and these contaminants are not considered to present a risk to human health at the SMCL. These regulations can be found online at <http://water.epa.gov/drink/contaminants/secondarystandards.cfm> or by calling the Safe Drinking Water Hotline at 1-800-426-4791. Contaminants at or above (or below, only for pH) the SMCL may cause aesthetic considerations, such as taste, color and/or odor.

Notation 4: According to the EPA revised total coliform rule (effective April 1st, 2016) total coliform bacteria are no longer considered a primary contaminant. Total coliform bacteria are still used as indicator organisms for the presence of pathogens. Their presence in drinking water may indicate there is a route for pathogens (certain bacteria, viruses or protozoa) to enter the drinking water. Even though there is no longer an EPA limit, the presence of total coliform bacteria in drinking water is a problem requiring further action and investigation. If your water has tested positive for total coliform bacteria it is important to examine your water system and take action to eliminate the total coliform bacteria when possible. Please see the well disinfection procedure for more information @ <http://www.nelabservices.com/pdf/Well-Disinfection-Instructions.pdf>.

Analytical results and reports are generated by NEL at the request of and for the exclusive use of the person or entity (client) named on this report. Results, reports, or copies of same will not be released by NEL to any third party without the prior express written consent from the client named in this report. This report applies only to those samples taken at the time, place, and location referenced by the client. This report makes no express or implied warranty or guarantee as to the sampling methodology used by the individual performing the sampling. The client is solely responsible for the use and interpretation of these results, NEL does not make express or implied warranties as to such use or interpretation. NEL is not able to make and does not make a determination as to the environmental soundness, safety or health of a property from only the samples sent to their laboratory for analysis. Unless otherwise specified by the Client, NEL reserves the right to dispose of all samples after the testing of such samples is sufficiently completed or after a thirty-day period, whichever period is greater. NEL's liability extends only to the cost of the testing.

Winslow lab is accredited by the State of Maine Department of Health and Human Services, Maine Center for Disease Control and Prevention (ME00009) and by the National Environmental Laboratory Accreditation Program (NELAP) through the State of New Hampshire Environmental Laboratory Accreditation Program (#2534). To see a current list of certifications see our website: www.nelabservices.com.
