Solar Roof, Battery Storage System and Power Management for Energy Independence

- Tesla solar roof – hidden roof tiles are actually the solar panel system
- Roof is hail, wind, and fire rated at the highest levels and has a transferable warranty
- 3 battery packson the South side of house and 1 in the garage; (13.5 kWh Powerwall 3's & DC expansion units)

Information although deemed reliable, should be verified by the reader.

- Basically, live off grid – net zero electric bill since installation, returning excess energy to Pen Light
- Energy credits back to Pen Light on a 1 to 1 ratio, credits generated are applied to winter bills
- Bidirectional electrical meter to record power both directions
- Tesla Solar Roofs come with a 25-year warranty covering product defects, power output, and weatherization to ensure the roof remains watertight. The warranty guarantees at least 95% power production after 5 years, with a 0.5% annual degradation for the next 20 years. Key, separate, 10-year coverage applies to the inverter and system components. [[1](#), [2](#), [3](#), [4](#), [5](#), [6](#)]
- Key Components of the Tesla Solar Roof Warranty
 - Product Warranty (25 Years): Covers defects in materials and workmanship for both solar and non-solar tiles. [[1](#), [2](#)]
 - Weatherization Warranty (25 Years): Guarantees the roof will stay in place and prevent leaks from rain, snow, or ice. [[1](#), [2](#)]
 - Power Warranty (25 Years): Ensures the tiles maintain a high level of efficiency—specifically 95% of rated power after 5 years, with a maximum 0.5% decrease per year thereafter. [[1](#), [2](#)]
 - Inverter/Component Warranty (10 Years): While the tiles have a 25-year warranty, the inverter, which converts power, is typically covered for 10 years. [[1](#), [2](#)]
- *Performance and Durability Ratings*
 - *Fire Rating: Class A (highest rating).*
 - *Hail Rating: Class 4 (highest rating).*
 - *Wind Rating: Class F (highest rating).*
- Span Panel
 - Smart electrical breaker panel – allows usage by circuit to be monitored & changed
 - Able to turn off breakers remotely
 - Enables efficient management of power usage, especially during power outages.
 - Contributes to energy independence.
