August 2026

Housing Market Report

Mortgage rates ended July near their highs for the year, taking some momentum out of homebuyer demand. But in San Francisco, sales have been driven more by wealth creation than by mortgage rates: the AI boom has spiked demand, especially for family-ready homes in specific neighborhoods.

That boom is concentrated in the city proper, with modest overflow onto the Peninsula. San Francisco's median sales price is up 25% year-over-year; San Mateo County is up nearly 10%. In the other eight Bay Area counties, price trends look much more like the country as a whole, essentially flat versus a year ago. We've included a map showing price changes across the region so you can compare how each area is faring.

Rates remain elevated largely on inflation fears, with bonds under pressure from war-driven energy prices, tariffs, and unchecked government spending. What could bring rates down? A substantial slowdown in the labor market would ease some of that inflationary pressure. The U.S. labor market is already sluggish, and Northern California shows the same pattern: unemployment is low, but so is job creation. It's a low-hire, low-fire economy nationally.

Beyond rates, jobs matter directly for housing, since relocations for work are traditionally a major driver of demand. In the Bay Area, some AI companies are hiring fast, but the broader regional story is slightly fewer jobs in recent months. That divide shows up in housing: job creation in San Francisco is fueling demand there, while sluggish hiring elsewhere in the region means less.

The August 2026 overview: local markets are diverging from both the regional and national picture. Real estate is local, but the bigger picture still matters.

Mike Simonsen

Chief Economist, Compass International Holdings

The first section of this report are select macro-economic and demographic data for the country and the Bay Area. In the second half of the report, we share all the details of the housing market.

Inflation Fears Keep Rates Elevated

Interest have stayed elevated due persistent inflation news, re-escalation of the war, and recently improved jobs data. Mortgage rates are at their highest levels of the year. This is likely to impact buyer demand into August.

Persistent Inflation

While June CPI dipped to 3.5% with lower energy costs for the month, inflation readings are still well above policy makers' target levels. Volatile energy markets and government spending keep inflation fears persistent. Elevated inflation implies elevated mortgage rates.

Bay Area Inflation Resumes

For a couple years post-pandemic, home price and rent declines in the San Francisco Bay Area kept inflation in the region below the national averages. Home price appreciation resumed recently and that has driven local inflation back up.

National Employment Slows in July

The labor market in 2026 remains sluggish. July payroll numbers missed expectations with 23,000 fewer jobs than a month prior. Weak labor data is mostly positive for interest rates, as it indicates a slowing economy.

Bay Area Job Growth Slows

While the most recent 12 months have been mildly positive for job growth in the Bay Area, four months in a row have reported a shrinking labor market for the region.

A Low Hire, Low Fire Economy

Even though job creation is slow nationally, unemployment remains at very low levels. Initial claims are at very low levels and long-term unemployment is improving. Americans are, by and large, employed. Continued low unemployment implies very few distressed home sales are in the pipeline.

Wealth Effect Helps Purchase Demand

When stock markets reach all time highs, a "wealth effect" is created for potential homebuyers in contrast to rising interest rates. This wealth effect demand is measurable especially in luxury markets across the country and has been especially acute in certain neighborhoods in San Francisco in 2026.

Bay Area Home Prices are Climbing

Thanks to very strong demand in certain neighborhoods, home prices overall in the Bay Area, as measured by the Case Shiller Index, are 2.2% above last year at this time. Local markets vary of course, see the sales price sections in this report for local detail.

Bay Area Migration Sources & Destinations

In 2025, inbound migration to the Bay Area resumed for the first time in many years. Seattle and Austin are net inbound to San Francisco. Lower cost of living cities remain popular destinations for outbound movers.

Marin Market Recap

Key Market Highlights

- Median sale price: **\$1.72M**, up **3% YoY**.
- **192 closed sales**, up **18% YoY**.
- **402 active listings**, down **22% YoY**.
- **165 listings in contract**.
- Median price per square foot: **\$855**, up **3% YoY**.
- Sale-to-list price ratio: **100%**, up from **97%** last July.
- **50 price reductions**, down **29% YoY**.
- Average days on market: **49 days**, down **6% YoY**.

Median sale price was **\$1.72M in July 2026**, up **3% YoY** from **\$1.67M**. Year-over-year appreciation moderated from **11% in June** to **3% in July**.

Tiburon had the highest median sale price at **\$3.05M**, down **9% YoY**. **San Rafael** recorded the largest increase at **28%**, while **Larkspur** recorded the largest decline at **30%**.

The largest concentration of closed sales was between **\$1M and \$2M**. **San Rafael** recorded the most closed sales overall, while **Stinson Beach** had **3 sales**, all above **\$5M**.

There were **402 active listings**, down **22% YoY**. **Novato** and **San Rafael** had the largest number of listings under **\$1M**, while **Tiburon** and **Belvedere** each had **8 listings above \$5M**.

Median price per square foot was **\$855**, up **3% YoY**. Kentfield had the highest at **\$1,249**.

The sale-to-list price ratio was **100%**, while price reductions totaled **50**, down **29% YoY**.

Average days on market was **49 days**, down **6% YoY** but up from **35 days in June 2026**.

San Francisco remained the region's strongest performer in July with 25% year-over-year price appreciation.

Compared with June, July brought broader improvement in year-over-year home price performance across the Bay Area. Napa's decline narrowed from -17% to -3%, while Santa Clara rebounded from -9% to +1%. San Mateo County strengthened from 8% to 10%. Marin County moved in the opposite direction, with appreciation slowing from 11% in June to 3% in July.

Home Price Changes Over Time

Median sales prices in Marin County have experienced some of the largest regional growth with a 2.7% year over year increase.

Sale-To-List-Price Ratio

The sale-to-list price ratio is best interpreted alongside price reductions. A high sale-to-list ratio can reflect aggressive marketing strategies rather than market strength, while an increase in price reductions signals sellers are adjusting to buyer demand.

Marin County

Average Days on Market: Speed of Sale

A measurement of how quickly listings go into contract. This statistic typically ebbs and flows per seasonal demand trends and is a lagging indicator of market activity 3 to 6 weeks earlier.
